

Our Vision, Mission and Values

VISION

We want to be a global leader delivering

- Innovation as a cost effective solution
- Solution as a service
- Knowledge as a service

Small innovations make great change in the life style and well-being of man.

MISSION

- By perpetual learning & implementation of latest, better process & technologies in our software and business solutions development.
- By continuously upgrading our processes and technical skills to meet (if not exceed)our clients' expectations.
- By providing our clients with solutions that are innovative, cost effective, reliable and robust.
- By giving CGS –ians a tributary atmosphere which boosts creativity that results in innovation and productivity, which facilitate professional growth and fulfils their career aspirations.

VALUES

- **Innovation& Creativity** – We promote lateral thinking and explore unconventional ways for accomplishing better results.
- **Integrity** - We believe in pursuing commercial goals without compromising on ethical and honest stature.
- **Empathy** - We agnize that the best way to interact with others is by seeing things from their perspective.
- **Learning** - We feel learning is a continuous

About Us

WHO WE ARE?

Coders Global was formed by a team of passionate and thoroughbred software professionals based out of India by 2008. With two full-fledged development centres in India, we are expanding our presence to more cities in the near future. Our core competencies include developing e-commerce solutions and enterprise portal solutions, Mobile and Game development, Web development, Content Management System and Custom web services. We have a dedicated team who are experts in their respective domains who develop out-of-box solutions that benefit our client's business requirements and thereby improve their bottom lines.

The company has a strong team of stake holders, who have held key positions in the top software companies worldwide and comes with a good blend of technical and managerial expertise. We are fully equipped for delivering quality solutions word-wide with the least lead time which provides us with high market competitiveness. We have been involved in various non-profit trial runs which include end-to-end project delivery exercises. Backed by our extensive experience, we offer a variety of software services to help achieve quicker ROI and predictable solutions.

With our dedicated development team, which comprises of very innovative thinkers, we have been incessantly pushing the limits of software development, incessantly experimenting with new technologies to provide the best solutions for any problem. Companies that approach us are always assured that the custom solutions we provide for them will always be apposite in this fast paced industry.

TO OUR CUSTOMERS

CGS's primary focus is to deliver innovation in technology as cost effective solutions.

We offer following to our customers

- Ready to use features
- Cost effective solutions
- Low Total Cost of Ownership (TCO)
- Greater Return On Investment (ROI)
- Quick delivery of products
- Excellent support
- Easy extensibility and Customization

WHAT WE DO?

CGS-ians rely on proven processes and methodologies to ensure organizations avail excellent services in a cost effective manner. We also undertake the outsourced work and deliver it on time without compromising on quality.

All applications developed at CGS are well tuned towards providing customer-centricity as the foremost objective and the technical development in consequence is so designed to enable a seamless integration with the identified business objectives.
